- Laravel

Projects

- **KATON 360 Degree Knowledge Hub**

KATON is a mobile and web-based educational tool. The best solutions for student preparation for WASSCE, JAMB, NECO, and GCE exams are accessible here, with over 15,000 interactive quizzes and thorough solutions. Through a combination of the greatest online instructors, books, journals, media, and technology, we provide students with a high-quality education that is both accessible and inexpensive, allowing them to achieve their academic goals and succeed on tests.

- **Ecomhealth Ghana**

Ecomhealth Ghana is a smart appointment booking system that provides patients or any user an easy way of booking a doctor's appointment online. This is a web based application that overcomes the issue of managing and booking appointments according to user's choice or demands. The task sometimes becomes very tedious for the compounder or doctor himself in manually allotting appointments for the users as per their availability. Hence this project offers an effective solution where users can view various booking slots available and select the preferred date and time. The already booked time will be hidden and will not be available for anyone else for the specified time. Doctors can also edit their appointment and can add prescription for patients, doctors can add lab reports and medicine names and medicine time for their patients. There is also feature of video call between patient and doctor.

- **Salon Management System**

I contributed my work in Salon Management System Where Salon Owners To Manintain Relation with clients Using Its Features...: Stock Maintain, Inventory, Appointment

Technology Used :

Frontend : AngularJs

Backend : Laravel

- **Budget Plan**

As a skilled Laravel developer, I have designed and developed a budget management software called Budget Plan. This software enables users to create and manage budgets, expenses, and upcoming expenses. The software has three roles - Superadmin, Admin, and User - to ensure effective management and tracking of budgets and expenses.

As the lead developer of Budget Plan, I have designed the software architecture, developed the back-end using Laravel, and implemented a responsive front-end using HTML, CSS, and JavaScript

With my expertise in Laravel and other web technologies, I have created a user-friendly and scalable software that can be customized to suit the needs of different organizations. I am proud to have contributed to the success of Budget Plan and am excited to work on similar projects in the future.
